POWER ★ WATER ★ ENERGY ★ INDUSTRIAL AUTOMATION

## Inovance VFD Solutions

The Inovance Group is a leading global provider of industrial automation solutions, founded in 2003. Inovance flexible production techniques and expert understanding of all industry sectors – from elevators to plastics to electric vehicles to robotics - has allowed the company to establish globally leading industry-specific business units. Inovance offer the full portfolio of industrial automation components including: AC drives, servo drives & motors, motion control, CNCs, PLCs and HMIs. Our team of expert engineers is experienced across all industrial sectors, from textiles to packaging to cranes to elevators.

- Low & Medium Voltage AC Drives, Multi Axis AC Drive
- Modular Ac Drive
- Servo Drives & Motors
- Elevator & Escalator Integrated Drive
- Intelligent Controllers & Displays (Std. PLC, Motion PLC, HMI)

## WONDERWARE (Formally Schneider) SCADA & HMI Solutions

When you are looking for cost-effective, scalable software solutions – [Rapturous Solutions](#) offers you top-of-the-line solutions through Wonderware SCADA. Wonderware is the market leader in real-time operations management software, HMI, SCADA.

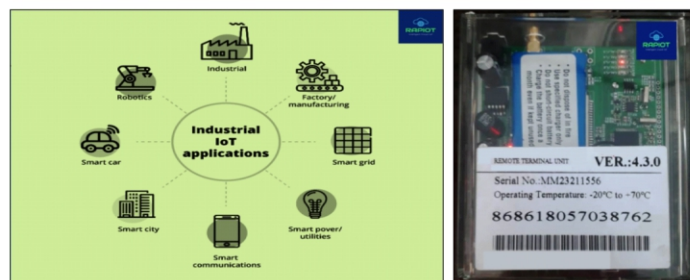

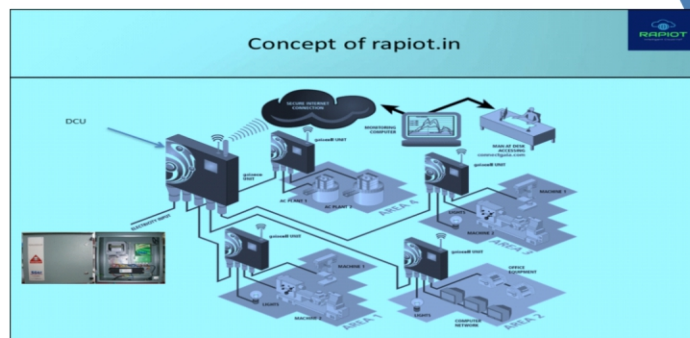

Wonderware software delivers significant cost reductions associated with designing, building, deploying and maintaining secure and standardized applications for manufacturing and infrastructure operations.

[Rapturous Solutions](#) supply & support nationwide of entire suite of Wonderware Software including Wonderware EDGE, Orchestra and Wonderware Intouch software solutions at an affordable cost. Maintaining quality of Plant data with software and hardware delivered while keeping costs in check.

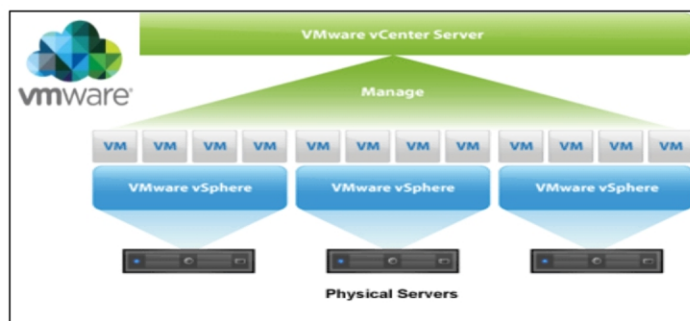

## RAPIOT - IIOT by Rapturous

RAPIOT is an Intelligent Web Based Solution which empowers user to Measure, Visualize, Analyse and Control the power & Water, RAPIOT solution is a state of the art smart energy management system that leverages advanced metering, sensors, proven IP communication technologies and a robust IT backbone to build intelligence into electricity network across the enterprise, RAPIOT is a combination of Hardware & Web Interface using the GPRS technology that informs the user on his consumption and thereby control it. It is an end to end smart energy management solution which provides user whether industrial, commercial or utility, many advantages through powerful reports and in-built control methods. No software to install/maintain. You don't need to become an energy management expert. Login to a secure account anytime, anywhere to pinpoint energy consumption or any industrial data visualize & control.

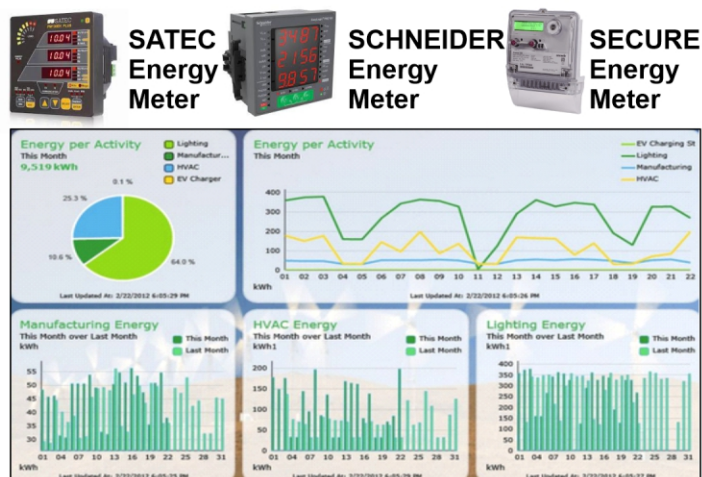

## VMWARE Virtualization

Virtualization is a technology that transforms hardware into software. Virtualization allows you to run multiple operating systems as virtual machines on a single computer. Each copy of an operating system is installed into a virtual machine. Virtualization is neither a Simulation nor Emulation. No need to upgrade your industrial software, you can run them on VMWARE platform. For more details visit [www.vmware.com](http://www.vmware.com)

## Energy Management System

An energy management system (EMS) is a system of computer-aided tools used by operators of electric utility grids to monitor, control, and optimize the performance of the generation or transmission system. With the Energy Meter various parameter of energy can be monitor in different format like tabular, trend etc. added with reporting system & sms alarming acknowledgment system. Individually we also deal with SATEC, SCHNEIDER & SECURE Energy Meters.

## Lithium ion Battery

We also deal with Industrial grade Lithium ion Battery pack, which is the direct replacement of Diesel Generator (DG) & other power resources without any maintenance or any operational cost. Lithium ion battery made in India is based on the active cell balancing technology for best performance and life expectancy, and remote monitoring via internet. The Life expectancy of Li-Ion battery is 2200 - 3500 charging cycle or likely 10 years. We can offer any load range upto 55 KWh for industry/domestic application, like Rural areas, Hotel, Hospital & housing complexes.

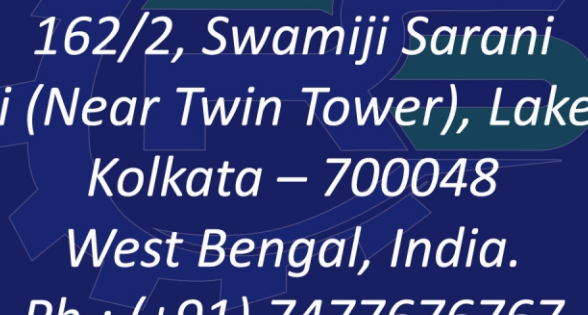

Li-ion battery are useful for

- \* Reduce Electrical bill
- \* Bridges power failure
- \* Reduce dependencies of power supplier
- \* DG replacement with better ROI
